

ABSTRACT OF THE DISCLOSURE

5           A system for managing printing and scanning  
and faxing functionality of a facsimile machine via  
a bi-directional parallel interface with which the  
facsimile machine is equipped. More particularly, a  
facsimile manager is provided for managing image  
files connected with printing, scanning and faxing.  
10       In addition, printing and scanning drivers are  
provided by which any Windows application program  
can access such printing, scanning and faxing  
functionality.
